CM Lock™

Connected Smart Locks + Access Control + Inventory Management Scanning

CM Lock is the next smart storage solution from CribMaster, combining connected smart padlocks with built-in barcode scanners to automate access control and inventory replenishment. Know exactly who accesses your inventory and when, and capture what is taken.

Traditional locks can't compete with the smart technology of CM Lock™

Where CM Lock™ is Used

CM Lock takes you from analog to digital. No more managing keys across your teams. CM Lock can be used with existing storage solutions that require access control including:

- Open access inventory cabinets
- Hazmat & chemical storage cabinets
- Tool cribs and parts cages
- Excess storage containers
- Equipment enclosures and sheds
- Lockout/TagOut appliantions
- Will-call lockers

Additional features coming soon—including the ability to get even more out of your lock with a mobile device.

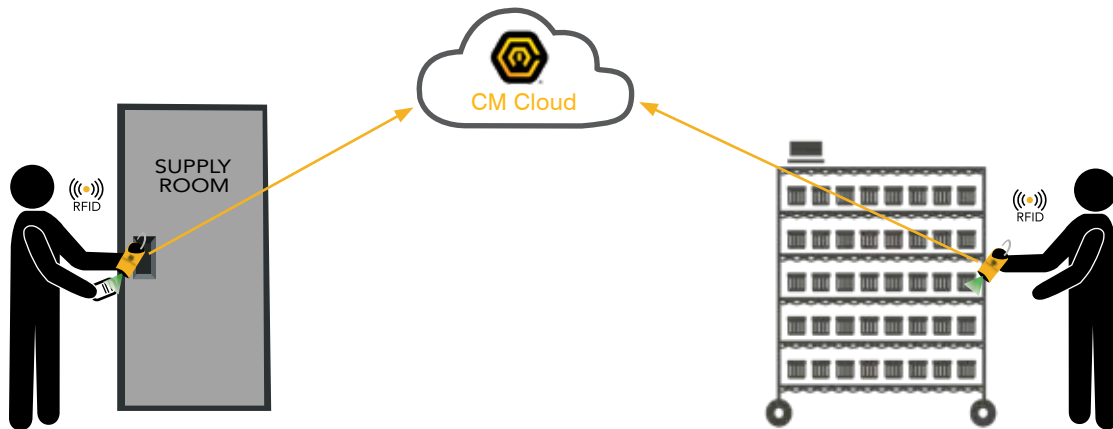

Features

- Built-in barcode scanner allow locks to be opened with employee barcode badges
- Rugged smart padlocks are IP-65 rated and operate in harsh weather environments
- Battery powered lock that can last up to 1-year before recharging
- CM Lock includes 2.4 Ghz Wi-Fi and LTE-M/ NBIoT cellular connectivity
- Connects to the industry's most powerful inventory & asset management software - CribMaster
- Order - allows users to use the lock to scan inventory barcodes to reorder stock.
- Issue - allows users to use the lock to scan inventory barcodes and issue inventory to their ID.

Benefits

- No more physical key management
- Leverage existing barcodes to enhance security
- Access for new users is granted within seconds
- Audit logs within CribMaster software provide detailed reports on when, where and how each device is being used
- Online customer portal lets users view, track, and manage connected devices
