# LPR

## Last Point Read System

Track tools and other mobile assets across your facility with our Last Point Read RFID Tool Tracking solution.

Determine where your tools were last seen, who had them and where they had them. Reduce search times for tools and assets dramatically while increasing accountability and ending tool and inventory floating and hoarding.

Post LPRs at every entrance and exit to extend the range of your tracking capability, and get a comprehensive picture of movement across your entire facility within your CribMaster software.

**Take your CribMaster RFID solution one step further with LPR**

RFID

Combining CribMaster's Inventory Management software and secure storage with passive RFID technology the LPR provides positive tool control that aids in FOD and FME compliance.

- Track tools and other mobile assets your facility
- Determine where the tools were last seen, who had them
- Dramatically reduce search times for tools and asset
- Increase accountability
- Stop tool and inventory floating and hoarding
