WINWARE RELEASES CRIBMASTER 7.5 INVENTORY MANAGEMENT SOFTWARE

Marietta, GA – WinWare Inc. is proud to announce its latest software release, CribMaster 7.5. WinWare takes pride in providing the manufacturing industry's most comprehensive, cost-effective solutions in indirect material and tool inventory management. Now CribMaster 7.5 continues its advancement by adding some great new feature sets.

The CribMaster system monitors tool inventory and usage, tracks consumption and budget, issues purchase orders either automatically or manually, and includes more than 190 standard reports tied directly to the database. CribMaster's flexibility means it fits the needs of manufacturers of any size, whether using an attended tool crib or store room, automated storage, or a combination of both. Still an option with CribMaster 7.5 is the Preventive Maintenance Module, which adds a work order system that automates scheduling and tracking of maintenance and repairs to assets.

CribMaster 7.5 includes new features that continue to propel CribMaster to yet another level and alliance partnerships have enabled CribMaster to add feature sets like "CBAI" (CribMaster Broker Auction Interface). This enables CribMaster users to post dead stock to an auction site from within the CribMaster application.

Some of the new features include:

CBAI (CribMaster Broker Auction Interface) to post surplus inventory on auction sites

A new reservation search/lookup screen integrated with a new automatic notification option. This will pop-up the screen anytime inventory becomes available that can be used to fill a reservation

A Purchase Order line item can now be individually closed without receiving any quantity against it

Projected calibration date display for usage-based gauges

ASN record import support

Print Screen support to directly print CribMaster screens to printer

Enhanced log file support for the Accu-port

Improved Serial ID support on CribMaster issue screen

New "Create Transfers" permission

Bin swapping support on ATR

Eight new advancements to the Preventive Maintenance Module

Three new licensing enhancements

Five major cycle counting enhancements

Six crib space enhancements

Over ten transaction changes/improvements

Over ten report management enhancements

and many more updates

About the Company
