

Accu-Cab RFID HD

RFID Point of Use Dispensing

CribMaster Accu-Cab High Density

Imagine your employees walk up to a cabinet that stores 750 pieces of expendable tooling or MRO items. Like all of our CribMaster point-of-use devices, the employee is required to identify himself or herself. The door unlocks and inside are bins that contain the items they need to complete their task. Each bin-cup is identified with a passive Gen2 RFID tag and when the item and bin cup are removed, inventory is automatically adjusted and monitored through CribMaster.

This device is a high-density, passive issue device that is easy to stock and The only additional step to employees is identifying who they are by a password on the touch screen or a bar-code scan. No inventory to scan or transactions to log. Transactions are automatically recorded when inventory is removed from the cabinet.

The CribMaster Accu-Cab HD brings many functions, features and benefits to your operation:

- Simple "plug and play" self contained RFID device (COTS)
- Touch screen control allows for User ID log in
- Configurable shelving to accommodate different size items
- Lot number and expiration date tracking and notification
- Ability to remove an entire bin of items and retain high accuracy
- Durable 100% made in the USA 16 gauge steel construction
- Direct e-mail or EDI communication with suppliers
- 190+ standard CribMaster reports with scheduling
- Custom report configurable with Crystal Reports
- Complete work order system and ability to track inventory to work orders
- Item reservation and predictive ordering
- Reduced mis-use of inventory
- Improved inventory accuracy
- Great solution for high-use tools or MRO inventory
