

CribMaster Cab-Lock

e - l o c k i n g m o d u l a r c a b i n e t s

The CribMaster Cab-Lock II modular cabinet storage system combines a proven electronically controlled locking modular cabinet with CribMaster Software to enable controlled distribution of inventory. Modular cabinets controlled by CribMaster enable a medium security distribution method that eliminates paper tracking and provides effective replenishment and usage tracking.

CribMaster has partnered with Stanley Vidmar, who has been creating modular cabinets in the US since the early 1950's to provide proven and reliable hardware. This combination of reliable hardware and the leading indirect material inventory management software, provides a management system that is second to none.

The CribMaster Cab-Lock II allows you to:

- Control Access to Modular Cabinets**
- Expand Control of Your CribMaster System**
- Scan Bar-Codes for Access to Inventory**
- Utilize All CribMaster Inventory Management Features**
- Benefit from Semi-Secure Distribution**
- Create Accountability Among Users**
- Establish Accurate and Timely Replenishment with Suppliers**

The CribMaster Cab-Lock II brings many functions and features to your shop floor, including:

- 13 Standard Drawer Sizes**
- Up to 15 Drawer Units**
- CribMaster is Fully Integrated**
- Works with Existing Employee Badges, Proximity Badges or Card Swipes**
- Tracking of Re-workable Items**
- Gage Calibration Tracking**
- FOD Control Features**

Inventory Management System

Cabinets

Each cabinet starts with one of four cabinet housing sizes. Housings are available in four heights. Each height receives a model number:

- 33 in. high - Model 175
- 37 in. high - Model 200
- 44 in. high - Model 245
- 59 in. high - Model 340

So if you need a Standard cabinet that is 59 in. high, the model number for the cabinet would be Standard cabinet Model 340.

Model 175

33 in. (838mm) high
30 in. (762mm) wide
27-3/4 in (705mm) deep

Model 200

37 in. (838mm) high
30 in. (762mm) wide
27-3/4 in (705mm) deep

Model 340

59 in. (838mm) high
30 in. (762mm) wide
27-3/4 in (705mm) deep

Model 245

44 in. (838mm) high
30 in. (762mm) wide
27-3/4 in (705mm) deep

MODEL#	USABLE HEIGHT	
	IN.	(MM)
20	2-1/4 in.	(57 mm)
25	3 in.	(76 mm)
30	3-7/8 in.	(98 mm)
35	4-5/8 in.	(117 mm)
40	5-3/8 in.	(137 mm)
45	6-1/4 in.	(159 mm)
50	7 in.	(178 mm)
55	7-3/4 in.	(197 mm)
60	8-1/2 in.	(216 mm)
65	9-3/8 in.	(240 mm)
70	10-1/8 in.	(257 mm)
75	10-7/8 in.	(276 mm)
80	11-3/4 in.	(292 mm)
85	12-1/2 in.	(318 mm)
90	13-1/4 in.	(337 mm)

Drawers

The next step to building a cabinet is the drawers. Like the model number given to each housing height, the drawers also have model numbers ranging from Model 20 up to Model 90. Each drawer model number represents a different drawer height. First choose one of the 4 standard height cabinets and make note of the model number. If you add up all the drawer model numbers for each cabinet, the sum total must equal the cabinet height model number. Thus, if you have a Standard cabinet Model 340 (59 in. high) with the below seven drawer model numbers, the sum total of those drawer model numbers should equal the 340 Model number used for the height of the cabinet. If the total sum of the drawer model numbers does not equal the cabinet height model number, then the drawers will not fit in the cabinet housing. (See Below)

Drawer Model Numbers

Useable Height

+40	(5-3/8 in.)
+50	(7 in.)
+50	(7 in.)
+50	(7 in.)
+50	(7 in.)
+50	(7 in.)
+50	(7 in.)
<u>+50</u>

Drawers fit items of all sizes as indicated by the usable height of each model. All drawer interiors are gray. All drawer interiors are delivered completely installed with partitions fastened to drawer bottoms and dividers placed in appropriate slots according to the Loading Diagrams.

Drawer depths, widths and usable space are consistent through all drawer usable heights. Refer to the drawing below for these dimensions.

Standard Drawer Features

- Drawer sizes are designed around average human reach (25-1/8 in. square [638 mm]) for easy access.
- Drawer heights range from 2-1/4 to 13-1/4 in. (57 to 336 mm) usable height.
- Drawers hold up to 400 lbs (181 kg).
- Drawers glide easily on a ball-bearing carriage system which is guaranteed against failure.
- Drawers are interchangeable with other drawers in cabinet housings of the same style.
- Each drawer has slotted walls for partitions and dividers, providing infinite configurations.
- Each drawer pull has a large label and plastic shield for quick, easy-to-read identification of contents.
