

Multi-Store™

Point - of - Use System

Multi-Store by CribMaster

Multi-Store is a medium security device with automated distribution well-suited for MRO items, safety products, and other various indirect materials. The system provides comprehensive tracking and usage information for more effective inventory management. Multi-Store delivers point-of-use material management as well as usage transaction information that allows electronic reordering. The system significantly reduces inventory, delivery and restocking activities. Lighted cabinets and see-through doors with shelves and shelf dividers enhance visibility and simplify supply location and access.

The CribMaster Multi-Store brings many functions, features and benefits to your shop floor:

Touch screen control allows for easy CribMaster user interface

Lighted cabinets and see-through doors, shelves and shelf dividers let you access items quickly

With inventory available in one convenient location, there's less time spent waiting and searching for supplies

Inventory can easily be grouped together on the shelves

Various sizes and shapes of materials can be stored

Secured doors for user-defined, medium security, single door/shelf access

Visible shelves simplify access to materials
