

AccuCab2D

RFID Point-of-Use Dispensing

CribMaster AccuCab2D

Same great technology as the original AccuCab but with a more visual front and a 2-door design. The AccuCab2D works well in environments where the larger, more industrial single door cabinet doesn't make sense. For instance, in a less industrial atmosphere like an office environment or lab the AccuCab2D is a much better fit.

Imagine your employees walk up to a cabinet that stores tooling, maintenance parts, kits, or even hazmat materials. Like all of our CribMaster point-of-use devices, the employee is required to identify himself or herself. The door unlocks and inside are shelves that contain the items they need to complete their task. Each item is identified with a passive Gen2 RFID tag and when the item is removed, inventory is automatically adjusted and monitored through CribMaster.

AccuCab Functions, Features, and Benefits:

- Simple "plug and play" self contained RFID device (COTS)
- Touch screen control allows for User ID log in
- Configurable shelving to accommodate different size items
- Total kit tracking and replenishment process tracking
- Lot number and expiration date tracking and notification
- Ability to remove an entire bin of items and retain high accuracy
- Durable 100% made in the USA 16 gauge steel construction
- 190+ standard CribMaster reports with scheduling
- Custom report configurable with Crystal Reports
- Complete work order system and ability to track inventory to work orders
- Item reservation and predictive ordering
- Reduced misuse of inventory & Improved inventory accuracy

AccuCab2D Differences from Standard AccuCab

- Brighter cabinet and more visible
- Lighter weight doors
- Better shelf labeling space
- Smaller footprint
- More appealing in less industrial environments

Dimensions: Inside 79" Tall x 52" Wide x 26" Deep

Useable Shelf Space Per Shelf: 44"W x 21"D

Standard 5 Shelves Per Cabinet but could accommodate many more depending on shelf height setting and product placement.
