

MultiLock

Electromagnetic Controlled Access

CribMaster

Inventory Management System

CribMaster MultiLock & CM Gate

MultiLocks are designed to secure any type of door or gate that closes against a fixed stop. Combined with CM Gate, a MultiLock will give you secure entry, based on one of the many security levels of CribMaster software. Add a CM Scanner and you now have a means to secure a free issue area. With employee process compliance, you will effectively manage, track, account, and replenish your inventory.

Simply scan your CribMaster employee badge and, if you are authorized to access the controlled area, the MultiLock will unlock the door or gate allowing access to the inventory inside. Once inside, remove the scanner from its cradle, scan the bin or item barcode and enter the transaction type. With this system, you can issue, return, transfer, relocate, replenish kits, send items to re-work and more. All MultiLocks are suitable for outdoor or controlled temperature use with an operating temperature range of -40 F to 140 F [-40 C to 60 C]. There are 4 models currently available with holding power of 600 lbs. to 1800 lbs. Standard is 600 lbs please specify if other is required.

MultiLock Functions, Features, and Benefits:

- Control access to tool cribs or store rooms
- Electronically control entrance
- Enable barcode scans for unlocking
- Utilize CribMaster permissions for entrance
- Help manage free issue areas
- Combine with scanners to accurately track inventory usage
