

CribMaster PADD

Portable Asset Dispensing Device

CribMaster PADD

The Portable Asset Dispensing Device (P.A.D.D.) is an industrial grade, secured point of use dispensing device that delivers inventory control, maximizes productivity and yields operational efficiencies. The P.A.D.D. utilizes highly accurate bin scale technology and CribMaster inventory software to immediately count and record inventory levels when an item transaction occurs.

The PADD comes in various models including indoor and outdoor models. There are three standard sizes of eight, ten, and twenty feet model. Custom bin configurations are available on customer request. This is a great device for managing consumables, PPE, MRO inventory, tools and other indirect material.

The CribMaster PADD brings many functions, features and benefits to your operation:

Increases Employee Safety - Enables management to stock PPE near active work areas to provide employees with easy access to required safety equipment.

Maximizes Employee Productivity - Device can be strategically placed on floor in close proximity to work area to reduce employee trip and wait time that occurs from travelling back and forth to centralized store room.

Reduces Inventory Loss - System tracks inventory usage by employee by transaction enabling management to monitor activity.

Increases Stocking Efficiency - Authorized personnel selects the appropriate item for restock on the touch screen interface, opens the door and places the items in the correct bin-No need for repackaging or tagging.

Automated Replenishment - System maintains accurate inventory levels by monitoring user defined reorder points by item type.

Inventory Alerts - Electronic notifications are generated when item minimum bin quantity is achieved.

Product Model	Standard Bin/Space Configurator		External Dimensions		
	Bin Qty	Bin Size	Length	Width	Height
10 PADD	64	8 1/4"W x 13"L x 9"D	10'	8'	8' 6"
20 PADD	128	8 1/4"W x 13"L x 9"D	20'	8'	8' 6"
8 PADD	56	8 1/4"W x 13"L x 9"D	8'	7'2"	7' 4"
