

# CribMaster RoboCrib

Rotating Carousel Dispensing

## CribMaster RoboCrib

With the RoboCrib, you gain single item dispensing of a large number of items of multiples sizes and shapes. The RoboCrib 2000 can hold up to 2574 items and the new smaller RoboCrib 1000 will provide access for up to 1050 items in less than 10 square feet of floor space. Each RoboCrib device is available with a variety of available bin sizes that makes managing both small and large items a reality.

Both RoboCrib machines provide access through one of 15 automated doors. The RoboCrib manages issue and return transactions of both fast and slow moving items in a high security environment, while eliminating repackaging. Driven by CribMaster you gain all the advantages of the most powerful and expandable software application for managing indirect materials.
