## **THE CRIBMASTER<sup>®</sup> TOOLCUBE<sup>®</sup> BRINGS POINT-OF-USE DISTRIBUTION AND ACCOUNTABILITY TO THE USE OF CUTTING TOOLS ON THE SHOP FLOOR**

Marietta, GA – WinWare introduces all the benefits of CribMaster tool vending combined with a modular drawer system. With configurable drawer sizes and no dropping of the tools being vended, the ToolCube™ is especially useful for cutting tools. Costly carbide tooling can now be securely distributed on the shop floor with total cost accountability, usage history, controlled access rights, automatic replenishment and critical alerts for suppliers. The ToolCube™ is powered by CribMaster™ and includes over 170 reports and with several drawer size options, CribMaster ToolCube™ can manage durable, serialized and expendable items.

“Like the other CribMaster point-of-use distribution devices, the ToolCube™ is simple to use,” states Larry Harper, WinWare President. The user walks up to the ToolCube™, scans an employee badge with the attached scanner or uses the touch screen to enter their name and password. The user selects the tool or supply they are searching for and a green light appears on the drawer containing the item. The user pulls the drawer and is allowed to access only the item that is selected.

When issuing a tool the ToolCube™ captures not only who is obtaining the tooling or supplies, but also which department they are from, machine they are working on, etc. This criteria is user definable which means each organization can set the machine to track up to six cost centers that are appropriate for their operation. So every time a tool or supply is dispensed management will know where it was used, who used it and why it was being used. CribMaster's automatic purchasing features, they can also be assured that the ToolCube™ will never run out of stock.

### **About the Company**

WinWare Inc. was established in 1992 in Marietta, Ga., just outside Atlanta. Its knowledgeable and experienced staff is dedicated to creating enterprise-wide systems that manage tools and inventory in the manufacturing environment. WinWare has a long-term reputation for providing outstanding customer service and technical support for each of its customers, no matter how large or small. The company is committed to providing expert software and hardware solutions for today's manufacturing inventory problems.
