CRIBMASTER ADDS COMMON NUMBERS TO THE CRIBMASTER INVENTORY MANAGEMENT SYSTEM

Marietta, GA – WinWare Inc. is proud to announce the latest feature in the CribMaster Inventory Management System. CribMaster software now boasts a Common Number feature based on Major Class, Minor Class and attributes to describe each tool in your inventory.

The Common Number feature will provide an end-user a number of benefits. First, by using the common item number feature, you will reduce the possibility of duplicate items in your system. Second, it will allow users to search for an item based on its attributes. Let's say a user doesn't know an item number but he knows exactly what he wants. He knows he needs a long Philips screwdriver so he can actually search CribMaster for that tool by its attributes. He enters the common item number screen, clicks search and selects Tool > Hand Tool > ScrewDriver > 3/8" > 9" Shaft > Philips Head. What a time saver!

WinWare takes pride in providing the manufacturing industry's most comprehensive, cost-effective solutions in tooling automation and management. The CribMaster system monitors tool inventory and usage, tracks consumption and budget, issues purchase orders either automatically or manually, and includes more than 170 standard reports tied directly to an Access, SQL Server or Oracle database. CribMaster Software controls the entire system including an attended toolcrib, automated storage, or a combination of both.

CribMaster is an all-inclusive inventory control system that improves manufacturers' ability to distribute and track tools and other supplies with accuracy and confidence. The Windows-based software, developed specifically for the manufacturing industry, uses bar coding to tie fast and reliable toolcrib and automated storage and retrieval transactions to a powerful system of inventory control.

About the Company

WinWare Inc. was established in 1992 in Marietta, Ga., just outside Atlanta. Its knowledgeable and experienced staff is dedicated to creating enterprise-wide systems that manage tools and inventory in the manufacturing environment. WinWare has a long-term reputation for providing outstanding customer service and technical support for each of its customers, no matter how large or small. The company is committed to providing expert software and hardware solutions for today's manufacturing inventory problems. Visit WinWare's Web site at www.CribMaster.com.
