WINWARE RELEASES THE CRIBMASTER MODU-LOCK™ MODULAR ELECTRONIC LOCKER SYSTEM

Marietta, GA – WinWare has combined the world’s leading toolcrib automation software with a heavy-duty modular, electronically controlled locker system called Modu-Lock. The Modu-Lock is controlled by CribMaster ATR software and is perfect for controlling gages, hand tools, serialized items, reworkable tools, kits and assemblies and MRO items on the plant floor and close to point of use. With software features that include the ability to create return only lockers, locking lockers that contain gages that require calibration and over 170 reports to enable effective remote management of the system and processes, the Modu-Lock is an obvious step towards operating leaner and controlling costs. “We continue to see companies focused on Lean Initiatives. The Modu-Lock is another part of the CribMaster inventory management system that helps improve inventory management processes to reach the goals of these initiatives”, states Larry Harper, WinWare President.

CribMaster drives cost reduction by automating replenishment, creating and distributing purchase orders, reducing pilferage and mis-use, setting item limits based on expected production and part usage, reducing labor involved with inventory management, reducing travel time to the storeroom or toolcrib and suggested optimum order points based on usage and a Gordon Graham inventory replenishment formula. Along with these areas of cost savings, CribMaster and Modu-Lock can also help identify process flaws and improve production performance by issuing items to cost centers and monitoring usage. CribMaster also has features to track FOD, lot numbers and expiration dates, issue work orders and distribute tools to complete the work order task, transfer items between cribs and point of use devices, and even link multiple sites to reduce surplus inventory from an enterprise level.

About the Company

WinWare Inc. was established in 1992 in Marietta, Ga., just outside Atlanta. Its knowledgeable and experienced staff is dedicated to creating enterprise-wide systems that manage tools and inventory in the manufacturing environment. WinWare has a long-term reputation for providing outstanding customer service and technical support for each of its customers, no matter how large or small. The company is committed to providing expert software and hardware solutions for today’s manufacturing inventory problems. Visit WinWare’s Web site at www.CribMaster.com.
