WINWARE'S MULTI-STORE: MULTI-PRODUCTS FOR MULTI-INDUSTRIES

Marietta, GA – WinWare, Inc is proud to announce the Multi-Store as the latest addition to our CribMaster point-of-use devices and system, which can save users 20%-40% on indirect material costs. Designed for indirect materials, such as MRO and tools, and driven by our CribMaster software, this cabinet can not only save costs, but it also manages replenishment and stock levels effectively. While it does carry some similarities to our other products, its uniqueness is important to various industries.

The Multi-Store is a medium security machine with shelving in various sized sections throughout the device. The glass doors on the front allow for visible access to the items which creates quick retrieval for employees. Once the door to a section is opened, the touch screen displays all inventory and their stock levels within this location. After an item and its quantity are chosen, the touch screen automatically updates the inventory available for the next time the location is accessed and communicates directly with the supply chain when reaching the EOQ.

This machine is well-suited for MRO items and supplies and is commonly used for scrubs/garments, gloves, safety products, etc. However, due to CribMaster's flexibility, it can be used in many different industry settings and is not limited to certain products. The shelving allows for a wide variety of items to be stored, regardless of their size and shape. Inventory can also be clearly grouped together to increase ease of locating and retrieval. The Multi-Store is integrated with the CribMaster software the same way as our other WinWare products. Management, replenishment, accountability, etc. are still maintained within the Multi-Store device as well as the ability to personalize its shelf layout.

The Multi-Store also brings other benefits and features to facilities. The touch screen creates ease with ATR user interface, lighted shelves allow for a 24/7 view of the stocked inventory and secured doors maintain the level of needed security. Employee access, like our other products, must be granted before inventory can be removed. "The Multi-Store conveys much of the same feel as other machines, but we at WinWare, Inc. hold trust in its uniqueness and know it will work extremely well in various facilities with no preference of industry" states Larry Harper, President of WinWare, Inc.

About the Company

WinWare Inc. was established in 1992 in Marietta, Ga., just outside Atlanta. Its knowledgeable and experienced staff is dedicated to creating enterprise-wide systems that manage tools and indirect material in the manufacturing environment. WinWare has a long-term reputation for providing outstanding customer service and technical support for each of its customers, no matter how large or small. The company is committed to providing expert software and hardware solutions for today's manufacturing inventory problems. Visit WinWare's Web site at www.CribMaster.com.
