CRIBMASTER EXPANDS IT PRODUCT LINE WITH A VERSATILE CAROUSEL DEVICE

Marietta, GA –WinWare Inc. announces the addition of the CribMaster Pro-Stock 560, a versatile carousel device which can be easily configured to hold many unique tools or MRO items with high security and a small footprint.

“This device once again enhances our extensive line of vending solutions for tools and MRO and overcomes some challenges with carousels we previously offered as part of our product line,” states Larry Harper, WinWare president, “our goal was to offer a simple device with less moving parts and could be easily configured in the field without major surgery.” Driven by CribMaster software, the leading inventory management application for indirect materials in manufacturing and productive environments, the Pro-Stock 560 adds yet another inventory management option to an already extensive line of solutions. Harper adds, “Our goal is to have the right inventory management solution for any indirect material, no matter the processes or business culture. The Pro-Stock 560 provides us with a reliable carousel option that far outweighs what we have offered in the past.”

The Pro-Stock 560 consists of up to 560 storage spaces in 10 individual carousel sections. Each individual tray is driven by a separate motor with no chains and very little moving parts. A user walks up to the Pro-Stock 560 and uses a simple to use touch screen display to log-in and search for their inventory. The proper carousel spins to the exact location containing the item. CribMaster software, the continued leader in indirect material management applications, takes it from there.

The CribMaster software that drives the Pro-Stock 560 contains the functionality needed to manage any type of indirect material. From tooling, spare parts inventory, PPE, MRO, etc., CribMaster is a robust and flexible inventory management application that was built by supporting the processes associated with this type of inventory. CribMaster currently has over 2400 customers in 13 countries and is the clear leader in providing technology to assist customers in reducing usage, tracking inventory movement, enhancing processes and developing more effective replenishment.

About WinWare

WinWare Inc. was established in 1992 in Marietta, GA., just outside Atlanta. WinWare is the clear leader when it comes to flexible, robust systems to manage MRO, tools and spare parts inventory. Its knowledgeable and experienced staff is dedicated to creating enterprise-wide systems that manage tools and indirect material in productive environments.
